15,410	**13,640**

Current Outbreaks

In congregate living settings, an outbreak of COVID-19 is defined as two or more laboratory-confirmed cases within a 28-day period.
In order for an outbreak to be closed, the facility must test all negative patients weekly until they have two consecutive weeks without a positive test and 28 days have passed since the last confirmed positive case.

Comparison Chart

Legend: Total Tested, Total Negative, Total Positive, Total Recovered
This chart compares the total number of tests conducted, total number of negatives reported, total number of positive patients, and the number of recovered patients.

Total Tests Conducted

This is the total number of tests conducted by UNC Caldwell, the Health Department, and other reporting providers. This number includes anyone tested regardless of what county they live in. It includes every test conducted by the listed organizations. For example, if an individual is tested five times, five tests are counted.
Tests Conducted Daily

This chart shows the number of tests conducted daily as reported to the Health Department.
Tests Conducted Weekly
This chart shows the number of tests completed each week.
Total Positive Cases Reported

This chart shows the total number of positive patients in Caldwell County.
Positive Cases Reported Daily

This chart shows the number of positive tests reported daily.
Positive Cases by Week

This chart shows the number of positive cases reported weekly.
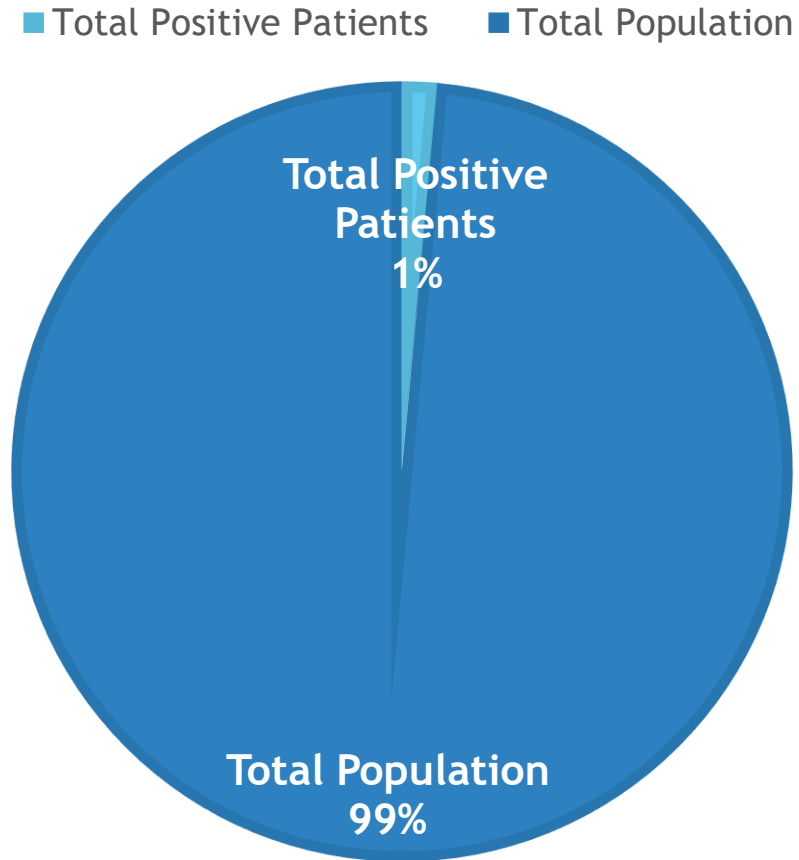

Average Number of Cases Reported Daily

This chart shows the daily average of positive cases reported each month.
Total Positive and Recovered Patients

This chart compares the total number of positive patients with the number of recovered patients.

# Total Positive Patients Compared to County Population
